SAVING WATER

In qualità di produttore leader di miscelatori, docce e sistemi doccia FROMAC, propone una gestione più efficiente dell'acqua in ambito domestico.

Considerando in particolare l'utilizzo dell'acqua come elemento vitale.

La protezione del clima inizia da semplici azioni quotidiane quali il farsi la doccia o lavarsi le mani.

Alle imprese che operano nel settore sanitario, viene chiesto di promuovere innovazioni che consentano notevoli risparmi idrici ed energetici durante la doccia o il lavaggio delle mani, senza tuttavia limitare il comfort e la qualità di vita.

Nel 2011 FROMAC ha imposto un nuovo standard per tutti i suoi miscelatori, introducendo un innovativo rompigetto in grado di ridurre il flusso dell'acqua del 30%.

Grazie alla combinazione di limitazione del flusso e arricchimento dell'acqua, FROMAC con la sua innovativa tecnologia VERDE propone articoli ecologicamente qualitativi.

usare con moderazione
use in moderation

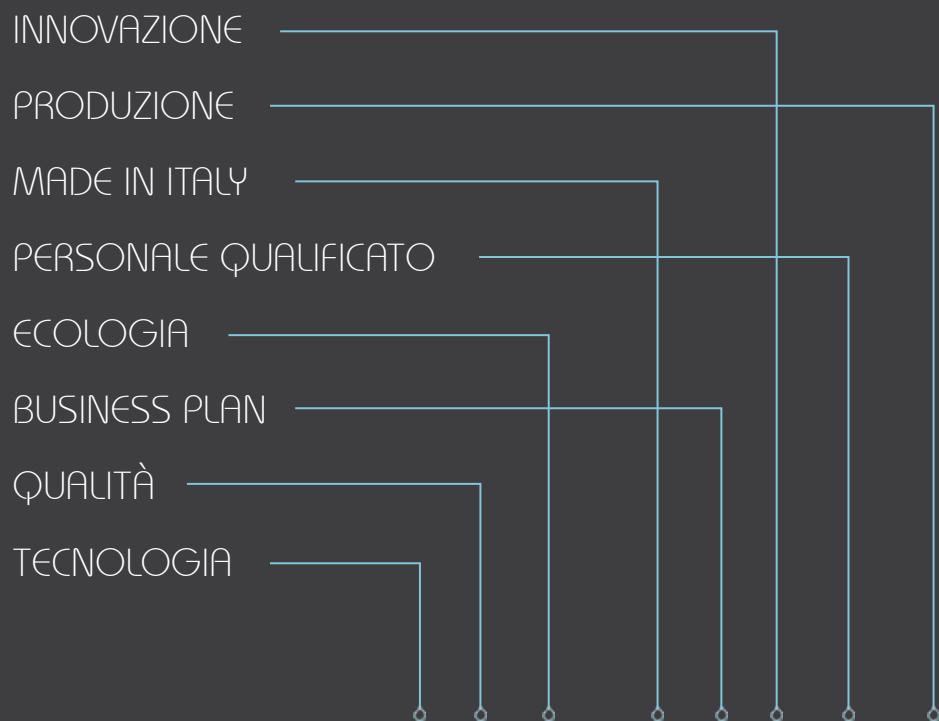

As a high quality leading manufacturer of mixers, showers and shower systems FROMAC, every effort is made to efficiently manage the use of the vital element water in the domestic environment.

Protecting the environment starts with the simple actions of having a shower or simply washing one's hands.

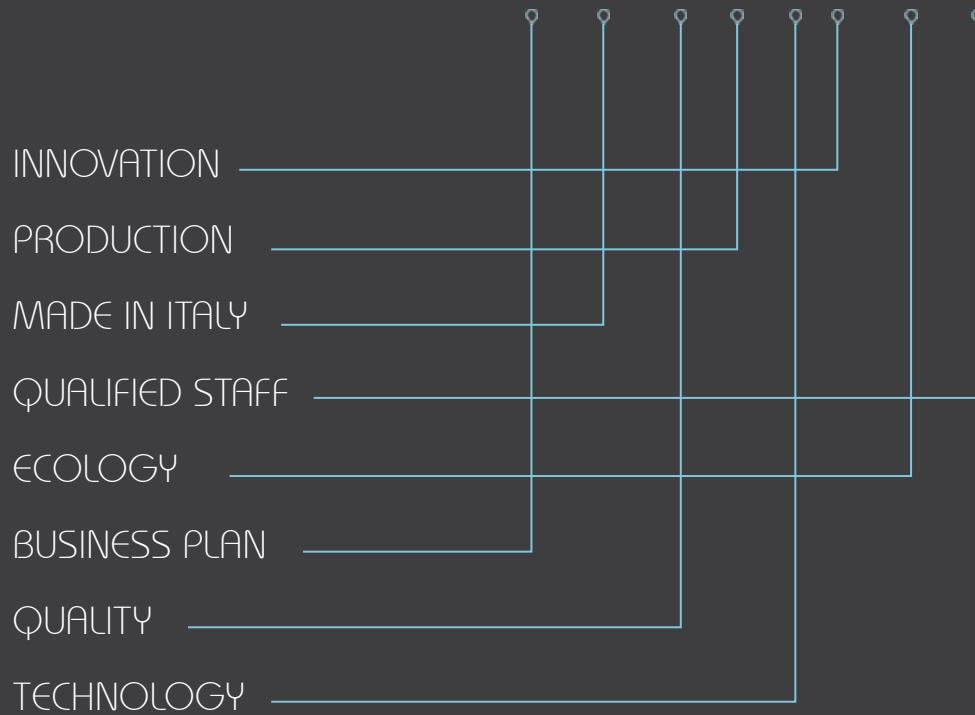

Manufacturers that operate in the sanitary sector are invited to promote innovative designs which constitute substancial savings in energy and water usage during showering or hand washing without limiting quality of life or comfort.

From 2012, FROMAC has set a new standard for all its mixers by introducing an innovative new flow regulator/aerator with a reduction in water flow of 30%.

Thanks to a rediction of water flow and fluid enrichment, using innovative GREEN technology, FROMAC is able to produce ecologically friendly products of high quality.

SLYDE

SLYDE reinterpreta in maniera rivoluzionaria il concetto di miscelatore: un semplice ed essenziale scorriamento della leva in avanti permette l'apertura del miscelatore.

L'acqua viene poi miscelata grazie ad una cartuccia a dischi ceramici nel più totale comfort, spostando la leva sempre facendola scorrere a destra o a sinistra.

Corpo e leva di questo nuovo miscelatore proposto da FROMAC sembrano fusi insieme fornendo così grazie alla nettezza delle sue forme un effetto ottico unico.

Il sinuoso getto a cascata completa esteticamente e funzionalmente SLYDE.

SLYDE è totalmente proposto in ottone e disponibile nella finitura cromata..

SLYDE is the invention of a revolutionary new concept in mixer taps : a simple forward slide movement of the lever allows the mixer to be turned on.

Hot and cold water mixing is then made in total comfort using a ceramic disc cartridge by moving the slide lever to the left or right.

FROMAC's proposed new mixer is composed in such a way as to give the appearance that both lever and body are fused together giving a neat optical effect of one single form.

The estetically pleasing and functional cascade effect of the water flow gives SLYDE it's magic touch.

SLYDE is totally made of brass and is available in chrome finish.

CORPO FREDDO

SICUREZZA E COMFORT TOTALE

Il miscelatore termostatico per esterno doccia AIRTHERM unisce al classico blocco di sicurezza l'innovativo sistema "CORPO FREDDO". Il corpo del termostatico rimane ad una temperatura che non provoca scottature oppure irritazioni alle pelli più sensibili come quelle di bambini ed anziani.

Installabile in tutti gli impianti domestici standard, il termostatico AIRTHERM grazie alla manopola di regolazione della temperatura posizionata sulla sinistra consentendo così all'acqua calda di scorrere senza riscaldare il corpo.

COLD BODY

TOTAL SAFETY AND COMFORT

The thermostatic mixer valve for the external shower AIRTHERM adds to the already standard safety features the innovative COLD BODY system. The body of the valve remains at a temperature which does not cause burns or skin irritations for sensitive skins like children or the elderly. The AIRTHERM external shower valve can be installed in all standard domestic systems, and using the temperature control handle positioned on the left, hot water can be made to flow through the valve without causing the body to get hot.
